EXPERIENCE

Software Engineer 2

2023 - Current

Rakuten - Cartera | Lexington, MA

- Developed and maintained web user-enhancing experiences using **React**, **HTML**, **CSS**, **Javascript**, **PHP**, and **MySQL** for leading partners including American Airlines, Delta, Southwest, United, Alaska Airlines, as well as major financial institutions such as Barclays, Chase, USAA, and Bank of America using web best practices.
- Collaborated with cross-functional teams (engineering, marketing, design) across client departments to deliver a wide range of web services and features, including immersive search experiences to improve customer engagement.
- Pioneered for the use of **AI** into my team's workflow. Transitioned to help integrate other parts of the engineering teams to have **AI** into their workflow. For example, setting up **Claude** agents in one team's codebase.
- Led **React** framework upgrades for multiple partners, ensuring seamless integration of the latest tools and resources, managed through **Jenkins** and **Rundeck**.
- Tested and debugged web experiences for optimal performance across devices and screen sizes using **Jest**, ensuring high-quality, responsive user interfaces.

Software Engineer Intern

May 2022 - December 2022

CommScope | Lowell, MA

- Collaborated with **Agile** ServAssure® NXT UI team to transition legacy **Javascript** code to **Angular** components in **Typescript**
- Developed table user interface **Angular** component with new features in **Nx** Monorepo that customers were using on a daily basis
- Tested and debugged **Angular** components using **Cypress** and **Storybook**
- Facilitated **Angular** components to be used by NXT customers and in future products through thorough documentation and abstraction in the source code

Software Engineer Intern

June 2018 - August 2018

Reflexis Systems | Dedham, MA

- Collaborated with a diverse array of departments dealing with logistics such as customer success, immigration, software, and financial
- Developed and debugged a filing algorithm for the company's client file database using **Python** and **R**
- Delved into high level AI, using **R**, by testing management software that the company was developing and launching to their corporate clients

Programmer

June 2016 - August 2016

IntelyCare Inc. | Quincy, MA

- Debugged and assisted in the development of the user application for the nursing side of the website using **HTML**, **CSS**, and **Javascript** by testing the flow of the user experience and adding new tools for the users
- Assisted with the company's goal to make connecting at home patients with nurses easier and more accessible

by optimizing an easy and direct link, web application, between both parties

EDUCATION

University of Massachusetts-Amherst | Bachelor of Science in Computer Science Completed

- GPA: 3.9/4.0
- Honors : Dean's List
- Relevant Coursework : Algorithms, Discrete Math, Linear Algebra, Search Engines, A.I., Database Management, Computer Networks, Web Programming, Computer Graphics, Scalable Web Systems, Secure Distributed Systems

PROJECTS

ULostIFound

- Lost and found web application for Umass students to report items missing or lost with interactive UI map
- Implemented **React JS**, **Node JS**, **Next.js** framework to create and design the web application
- Managed **MongoDB** as database to store information for missing and lost reports and added **Docker** for deployment

MySquad

- A modern sports and esports team tracking dashboard. Follow your favorite teams across NBA, NFL, MLB, NHL, League of Legends, CS:GO, Valorant, and Dota 2
- Passion project that I truly enjoy as a huge sports fan in all aspects
- Implemented **React JS**, **Node JS**, **Typescript**, **Next.js** framework to create and design the web application
- Managed **Supabase** as database to store information for missing and lost reports and added **Vercel** for deployment
- Implemented Claude **AI** as a core part of development and **Nginx** as **load balancer**
- Implemented **Python**, **Django**, **Celery**, **Redis** and **Kafka** to manage **RESTful APIs** and backend processes

SKILLS

- Languages:
 - Python, Java, Javascript, Typescript, HTML/CSS, SQL, R, C++, PHP
- Frameworks:
 - Git, React, Django, Angular, Docker, Cypress, Node.js, MongoDB, Kubernetes, Jest, Jenkins, Rundeck, Webpack
